Reusable Blood Pressure Cuffs

If you need a reusable blood pressure cuff, you have found what you are looking for. Our blood pressure cuffs, made of durable and long-lasting materials, appeal to a wide audience and have been developed to adapt to all difficult conditions that may occur in the clinical environment.

Easy Application and Placement: Thanks to its improved design, it facilitates application to the patient. Color-coded dimensions and range markings have been prepared considering all the details required for a perfect fit and accurate measurement.

Durability: Our blood pressure cuffs, made of water-repellent polyester fabric, are long-lasting and resistant to water etc. It ensures minimum cross-contamination as it removes the substances. We offer you our velcro fasteners, which are made of polyamide and polyester and have a minimum opening-closing life of 10,000 times, supported by professional stitches and first-class materials.

100% Reliable Measurement: Each reusable blood pressure cuff is delivered to you after passing the leakage test for accurate measurements and values.

Quality Standards: FODI Blood Pressure Cuff is developed and produced in accordance with the EU 2017/745 Medical Devices Regulation, in CE and TSE standards. Multiple Configurations: With various connector options, our cuffs are compatible with devices produced by all major healthcare facility equipment manufacturers in the world and also offer single and double hose options.

Material: For the safety of the patient, we do not use any materials containing latex, PVC or DEHP, and we produce our inner cuffs from high pressure resistant TPU material.

Fabric; Latex FREE, PVC Free, Good biocompatibility, free from biological hazard to skin

Patient sizes from neonate to Large Adult Size Icons, allows for rapid size identification
